

Why hemp?

Hemp, the common name for a variety of Cannabis (family Cannabaceae) has been cultivated for thousands of years. From ancient times, people have utilized hemp for a wide variety of purposes including making rope, twine and cloth. But use of the plant also found its way into ancient, as well as later day, medicinal use for a wide variety of conditions and ailments. In fact, tinctures of cannabis were widely available in apothecaries throughout the developed world as late as the early 1900's.

Today, even cursory searches of the internet will yield countless indications that cannabinoids, the active ingredients in hemp and other plants, may have significant benefits. But the same cursory searches will also quickly inform the reader that THC is the cannabinoid responsible for the "high" humans experience when ingesting or smoking. Hemp contains little or no THC.

At im·bue botanicals, our proprietary products contain NO or very low amounts of THC*. In addition, our unique, low temperature-low pressure processing of the whole plant ensures that our products are fully-infused with all the most beneficial cannabinoids and other compounds, including natural terpenes. It's what we call Full Spectrum, and it's designed to provide outstanding results.

But unlike others, we utilize 100% organic hemp, carefully cultivated under the most stringent standards, in the clean mountain air of Colorado. And that not only produces an unmatched product, but also helps to reduce carbon emissions and improve our planet's health as well!

* Less than .3% THC dry weight

TINCTURES

Experience That Matters

With nearly three decades of experience in the cannabis and healthcare industries, the founders of im·bue botanicals are passionate about utilizing our expertise and know-how to deliver exclusive, proprietary products, designed and envisioned to provide outstanding results. Our "Earth First" approach to business, as well as consumer wellbeing, is fundamental to all that we do. With our extensive development skills, we personally develop and source all of our products right here in the U.S., utilize the highest quality organic ingredients, and never compromise.

im·bue botanicals is not content to deliver "me too" products, but rather, we focus on key factors which we believe increase efficacy and separate us from the pack. Presentation of product, we believe is as important as the product itself. But most important is the quality, consistency and sustainability our products are produced under.

In a small way, im·bue botanicals is our way of giving back to all of our customers who understand as we do, and are looking for better, more thoughtful solutions. It's why we say, im·bue is *for those who know...*!

Our Products:

*If some is good...
...more isn't always better.*

im·bue subscribes to the principle that LOW-DOSE CBD, in most cases, provides superior results. High doses of CBD can actually interfere with the natural endocannabinoid system of most mammals, resulting in lower levels of effectiveness and even resistance over time. LOW-DOSE CBD on the other hand, can provide optimum benefits in the vast majority of applications. And frankly, this is one of the key reasons why we say what we do...*for those who know...*!

NO SOY NO ADDED SUGAR NON-GMO
CRUELTY FREE VEGAN

At im·bue botanicals, we carefully formulate our products for optimal CBD concentrations and NO or LOW levels of THC. Organically grown in Colorado, our unique, processing of the whole plant ensures that our product is fully-infused with all the most beneficial *cannabinoids* and *terpenes* which are easily destroyed with other processing methods. It's what we call Full Spectrum, and it's designed to provide outstanding benefits. And at im·bue botanicals, all of our products are batch tested by independent laboratories prior to shipment to ensure quality and consistency.

Our proprietary liquid product utilizes all-natural, organic vegetable glycerin as the base. This ensures a pleasant taste, without any unhealthy additives. And our exclusive capsules provide a convenient alternative when a higher, more sustained dose is preferred.

We also offer our unique topical product line, *em·body*, as well as convenient, prefilled cartridges for use with vaporizers.

And we offer a full line of products for 2-legged and four-legged customers!

PRODUCT CAUTIONS: *It's a good idea to always consult your physician when adding supplements to your diet. These products are not intended to diagnose, treat, or cure any disease, and no claims regarding such are made.*
