

Details of LDN Radio Shows in September

2nd September - The LDN Book 2

Listen to the authors talk about their respective chapters in The LDN Book Volume 2 which is being launched 14th October 2020.

[Check our how is hosting The Book Tour Events.](#)

9th September - Dr Andrew Wong

Early in his medical career, as both an inpatient attending and outpatient primary care doctor, Dr. Wong witnessed the best and worst of Western medicine: the triumph of acute life-saving interventions coupled with frustratingly ineffective approaches to complex chronic conditions. So often a one-size-fits-all prescription didn't work. Patients weren't receiving what they really need: time, a deeper definition of the root-causes of their illnesses, and the knowledge, tools, and support to improve their health.

16th September - Teresa

fibromyalgia. She also has other health problems such as CFS, Thyroid dysfunction, Spondyloarthritis, IBS.

23rd September 2020

Frequently asked questions answered by our medical professional advisors and members.

30th September 2020

Sajad is one of the rare MD's personally licensed in all 50 States, as well as Washington D.C. and Ontario. He has extensive experience working with startup companies in the telemedicine telehealth field and has been an advisor to multiple successful healthcare startups, including Pill Club, Jack Health, forHims. He has been treating patients with LDN for years and continues to find it useful for all sorts of conditions.

**Did you miss any Shows in August?
If so...**

Ani has Hashimoto's and had all the terrible debilitating symptoms. Her doctors didn't detect it and she suffered for quite a while. She eventually found Low Dose Naltrexone (LDN) and has recovered to almost a normal life. She explains how her 3 children benefit from taking LDN for 3 different conditions.

Bev has suffered unbelievably for years with Graves and various types of psoriasis. Multiple doctors prescribed drugs that caused further suffering from terrible side effects. One drug caused damage to her thyroid. Listen to her story as she finally discovers LDN which changed everything. She was able to wean off all other drugs and correct her lifestyle and diet. Life is wonderful again!

Delo first had her MS symptoms at 32 and was eventually diagnosed with Relapsing-Remitting MS. She had most of the symptoms and refused the ms drugs, feeling they were unproven and ineffective. She heard of Low Dose Naltrexone in 2000 and was lucky that her neurologist was willing to prescribe it. She describes the quick and thorough return to a normal life. You will enjoy this wonderful success story!

Dr Harpal Bains specializes in hormone therapy and discusses the many situations where it is most effectively applied. She describes how testosterone levels are tested and how they can be increased along with Low Dose Naltrexone. She is one of those open-minded doctors who will research and utilize new methods versus sticking to what is taught in medical schools.
