## tinctures

imbu botanicals.com

Imbue Botanicals Tinctures are vastly different than our competition. Rather than combining our organic CBD oil with MCT oils like most companies, we utilize an organic vegetable glycerin from pygmy palm fruit for a better, more natural taste and faster absorption. Organically grown in Colorado, our unique, low pressure and temperature processing of the whole plant ensures that our product is fully-infused with all the most beneficial cannabinoids including terpenes which are easily destroyed with other processing methods. It's what we call Full Spectrum, and it's designed to provide outstanding benefits. And at im.bue botanicals, all of our products are batch tested by independent laboratories prior to shipment to ensure quality and consistency.

Our Tincture of Hemp comes in four strengths to suit whatever your needs. Our health product has 40mg CBD in the 1 fl. oz. bottle, our vitality product has 100 mg and our elevated product, available in 1 and 2 ounce sizes has 250mg, and our imbued black label has 500 mg in a 1 ounce bottle. All our tinctures are non-GMO, Vegan, cruelty-free and contain no added flavors, sugars or fillers.
